

ITALIAN MARBLE FLOORING
EXQUISITE CRYSTAL CHANDELIERS
MING VASES...

SO WHY SHOULD YOU
COMPROMISE
ON YOUR PLYWOOD?

Your spaces speak volumes about your good taste. Each nook and corner has been designed with care. Every exquisite piece carefully chosen and thoughtfully placed. And complementing your refined aesthetics is **PEEL Ply**: plywood made from 100% pure Burmese Gurjan wood and manufactured using hydraulic treatment and pre-press technology.

Gurjan timber imported from Myanmar is reputed for its strength and durability. In fact, it compares favourably with teak in most strength categories and is actually 40% more resistant to shock loads. Its rich reddish-brown colour and appearance make it a natural choice for versatile furnishing applications.

Presenting PEEL Ply. The 'no-compromise' plywood.

PEEL Ply sources the best of Gurjan timber to give you 'no compromise' plywood. Come, discover the secret of some of the best homes and commercial spaces...

No compromise on strength

No compromise on quality

No compromise on consistent thickness

No compromise on density

No compromise on ensuring that each piece of plywood is termite and borer proof

No compromise on durability

One of the most respected brands in this demanding industry, PEEL Ply is the first choice for discerning customers who share our obsession with quality. Stringent quality checks at every stage of production ensure that you get the best ply your money can buy! Here's how we checkmate competition...

- Core pieces arranged to ensure unmatched evenness and consistent thickness throughout the sheet.
- Seamless edge bonding which enhances the quality of the core and veneer layers.
- Superior quality glues to prevent splitting or cracking of plywood.
- Latest equipment and technology for core and veneer peeling, drying and processing. The superior veneers thus produced are consistent in dimension and quality.

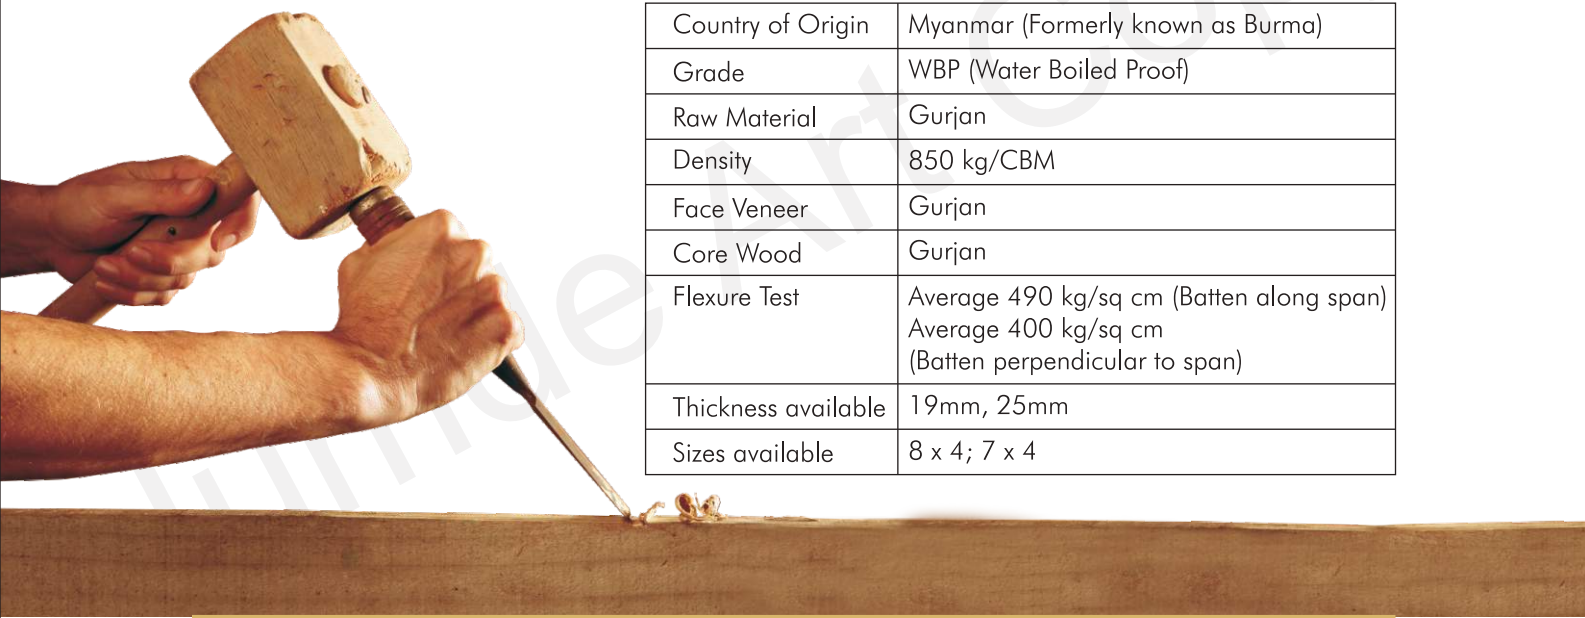

**Block Boards -
Ancient history meets new technology**

It is believed that Egyptians used Block Boards to make furniture thousands of years ago! Today, Block Boards are the material of choice for doors, kitchen cabinets, shelves, long tables, settees, benches, partitions, bed frames and more. With fewer tendencies to sag or bend, Block Boards are preferred for applications where long pieces of wood are required or where the strength of furniture is critical. The strength of Block Boards comes from the core, which is made of solid blocks of wood, sandwiched between veneers of hardwood. This is then glued under high pressure. PEEL Ply's range of Block Boards are made from Burmese Gurjan Timber, reputed for its quality and rich looks.

Let's get technical!

Country of Origin	Myanmar (Formerly known as Burma)
Grade	WBP (Water Boiled Proof)
Raw Material	Gurjan
Density	850 kg/CBM
Face Veneer	Gurjan
Core Wood	Gurjan
Flexure Test	Average 490 kg/sq cm (Batten along span) Average 400 kg/sq cm (Batten perpendicular to span)
Thickness available	19mm, 25mm
Sizes available	8 x 4; 7 x 4

Strength that's forever!

As a company that is constantly innovating and raising the quality bar, again and again, PEEL Ply is proud to claim that our Block Boards are among the finest in India. Our Block Boards are manufactured using Burmese Gurjan timber. The technology we use of alternate join battens inside ensure zero gaps and provide excellent strength and durability to the finished product.

Block Boards from PEEL Ply come with a host of features!

- 100% Waterproof
- Termite/Borer Proof
- Strong immunity to moisture and micro-organism
- No bending, warping, corrugation or undulation
- No veneer slicing
- No default in core
